SUMMARY

Full-Stack Software Engineer with 3+ years building scalable web and mobile applications using .NET, C#, Flutter, React, and Angular. Skilled in Clean Architecture, CQRS, and vertical slice patterns, with hands-on expertise in cross-platform mobile development, payment integration, and containerized deployment. Proven record delivering production systems across e-commerce, telecommunications (eSIM), and enterprise domains.

EXPERIENCE

Software Engineer

Sep. 2025 – Present

Netcom Group

Algiers, Algeria

- Develop cross-platform mobile applications for the travel eSIM domain using Flutter (Dart) and .NET backend services built on Clean Architecture and vertical slice architecture.
- Integrated telecommunications and eSIM provisioning APIs, enabling automated plan activation and real-time data-consumption tracking.
- Implemented Orange payment gateway integration for secure in-app transactions across multiple regions.
- Built an AI-powered customer-support chatbot using n8n workflow automation connected to the .NET backend with email-escalation handling.
- Deployed services with Docker and managed data persistence on SQL Server; contributed to Angular-based web interfaces.

Full-Stack .NET / React Developer

Oct. 2024 – Sep. 2025

IT Solutions Algeria

Boumerdes, Algeria

- Developed and maintained web applications on Clean Architecture, ensuring a modular, maintainable, and scalable codebase.
- Implemented FluentValidation for robust, reusable validation logic, improving data integrity and input handling.
- Collaborated with cross-functional teams to deliver integrated backend and frontend solutions using C#, EF Core, CQRS, React, and TypeScript following modern best practices.

Full-Stack Developer

Oct. 2022 – Oct. 2024

BM Tech

Algiers, Algeria

- Built and maintained a full-stack application using C# and Blazor (WASM/Server), delivering an intuitive, high-quality user experience.
- Designed and implemented a Web API with ASP.NET and EF Core for seamless front-end/back-end communication and efficient data operations.
- Integrated DevExpress controls and developed a real-time chat feature with SignalR to enhance UI/UX and user collaboration.
- Implemented Quartz.NET scheduling and optimized SQL Server performance through query tuning and indexing, applying SOLID principles and SonarQube analysis on an E-Health LIMS/RIS platform.

EDUCATION

Mustapha Stambouli University

Mascara, Algeria

Master's Degree in Software Engineering

Sep. 2020 – Jul. 2022

PROJECTS

Kabas-Forms | .NET, React, SQL Server

- Developed a dynamic form-building platform serving the Algerian community, with a scalable .NET backend, React frontend, and SQL Server storage.

Dar-El-Khotba | .NET, React, Docker, SQL Server

- Built an e-commerce platform for selling engagement and wedding gifts, with product catalog, cart, and order management.
- Containerized the application with Docker for consistent deployment on a .NET and React stack.

Noon | .NET, React, Docker, SQL Server

- Developed a private-school management system handling student, staff, and administrative workflows; deployed via Docker with a .NET, React, and SQL Server stack.

TECHNICAL SKILLS

Languages: C#, Dart, JavaScript, TypeScript, SQL, HTML/CSS

Backend: .NET, ASP.NET Core, EF Core, CQRS, MediatR, Clean Architecture, Vertical Slice Architecture, SignalR, REST APIs, FluentValidation

Frontend / Mobile: Flutter, BLoC, React.js, Angular, Blazor (WASM/Server), Tailwind CSS, Bootstrap, DevExpress

Databases: SQL Server, PostgreSQL

DevOps & Integrations: Docker, Git, n8n, Orange Payment, PayPal, Firebase FCM, Google/Apple Sign-In, eSIM/GSM APIs

Practices: SOLID, Quartz.NET, SonarQube, Agile

Languages: Arabic (Native), English (Intermediate), French (Learning)
